Operating Your Fleetwood Prowler Fifth Wheel Awning

Manual vs. Electric Operation

Most modern Fleetwood Prowler awnings feature electric motors, enabling effortless extension and retraction. Manual models, although less common, require hand cranks and are more suited for temporary or backup use.

Operating Tips

- Extension and Retraction: Use the remote or switch to extend or retract slowly, avoiding abrupt movements.
- Wind Conditions: Retract the awning during high winds to prevent damage.
- Sun and Weather Monitoring: Extend awnings early in the day to maximize shade or retract during storms.
- Positioning: Adjust support arms if adjustable to optimize tension and avoid fabric sagging.

Maintenance and Care for Longevity

Proper maintenance ensures your Fleetwood Prowler fifth wheel awning remains functional and attractive for years to come.

Regular Cleaning

- Fabric Cleaning: Use mild soap and water; avoid harsh chemicals that can degrade fabric.
- Frame Maintenance: Inspect for corrosion or damage, and clean with a soft brush or cloth.
- Drainage: Ensure water drains properly without pooling, which can cause mold or damage.

Inspection and Repairs

- Check Seals and Weatherstripping: Replace worn or damaged parts promptly.
- Support Arms and Hardware: Tighten bolts and inspect for rust or corrosion.
- Motor Functionality: Test electric motors periodically; lubricate moving parts if recommended by the manufacturer.

Storage Tips

- Retract During Severe Weather: Wind, snow, or heavy rain can damage the awning if left extended.
- Winter Storage: Clean thoroughly, dry completely, and consider covering or retracting to prevent snow accumulation.

Troubleshooting Common Issues

Even with proper maintenance, issues can arise. Here are some common problems and solutions:

Issue	Possible Cause	Solution
Awning not extending/retracting	Electrical fault or motor failure	Check circuit breakers, wiring, and replace motor if necessary
Fabric sagging or wrinkles	Improper tension or fabric wear	Adjust support arms or replace fabric if worn
Water pooling on the fabric	Poor slope or drainage	Reinstall support arms with correct angle or clear drainage paths
Noise during operation	Obstructions or lack of lubrication	Clear debris, lubricate moving parts, and tighten hardware
