- Avoidance of nested or complex semantic tags that may complicate rendering or accessibility.
- Emphasis on inline styles or minimal external CSS to reduce cognitive load.

Responsive and Touch-Friendly Design

Since babies interact mainly through touch, the design must be:

- Large clickable areas: Buttons and images should be sizable.

- Simple gestures: Limited to taps or gentle swipes.
- Responsive layouts: Adaptable to various screen sizes, including tablets and smartphones.

- What standards should govern such content? There is a need for industry-wide guidelines to ensure safety, efficacy, and ethical standards.

Moving forward, collaborative efforts among technologists, child development experts, and caregivers are essential to refine these designs, establish standards, and ensure that the digital experiences provided to infants are both beneficial and safe. As the field evolves, HTML for Babies could become a foundational element in early childhood digital literacy, shaping a generation that navigates technology with confidence and care.
