- The original village was located at an elevation of approximately 1,400 meters.
- Several homes, farms, and communal buildings were dismantled or abandoned before flooding.

The Flooding Process

The process of creating the Tignes reservoir was meticulous and controversial. It involved:

- Relocation of residents: A handful of families were moved to new villages or different parts of the valley.
- Construction of the dam: A concrete arch dam was built, which began flooding the valley in the early 1960s.
