Sample Puzzles from the 2019 Edition

While the exact puzzles vary, here are examples representative of what you might find:

Example 1: Logic Puzzle

You have three boxes. One contains only apples, another only oranges, and the third contains both apples and oranges. All boxes are labeled incorrectly. You may pick only one fruit from one box. How can you correctly label all the boxes?

Solution:

Pick a fruit from the box labeled "Mixed" (which is incorrectly labeled). If you pick an apple, that box contains only apples. The remaining labels can then be corrected accordingly.

Example 2: Math Puzzle

What is the next number in the sequence: 2, 6, 12, 20, 30, ?

Solution:

The pattern adds an increasing even number each time: +4, +6, +8, +10. The next addition should be +12, so the next number is $30 + 12 = 42$.

Example 3: Word Puzzle

Rearrange the letters in "LISTEN" to form another word that means "to hear."

Answer:

"Silent" (though it has a different meaning, the puzzle may be a trick; alternatively, the puzzle may be to find an anagram that relates to hearing).
