Sample Maternity HESI Practice Questions with Explanations

To help you get started, here are some sample questions covering key areas of maternity nursing.

Pregnancy and Antepartum Care

Q1: A pregnant woman at 28 weeks gestation reports visual disturbances and severe headaches. What should be the nurse's priority action?

- a) Encourage rest and hydration
- b) Assess fetal heart rate

- c) Notify the healthcare provider immediately
- d) Reassure her that these are common symptoms

Answer: c) Notify the healthcare provider immediately

Explanation: Visual disturbances and severe headaches in pregnancy can be signs of preeclampsia, a potentially life-threatening condition. Immediate assessment and intervention are necessary.

Labor and Delivery

Q2: During active labor, a patient's contractions are occurring every 2 minutes and lasting 90 seconds. The fetal heart rate is dropping to 90 bpm. What is the nurse's priority action?

- a) Encourage the patient to change positions
- b) Prepare for emergency delivery
- c) Turn the patient on her side and administer oxygen
- d) Document the findings and monitor

Answer: c) Turn the patient on her side and administer oxygen

- a) Suction the mouth and nose
- b) Provide oxygen via nasal cannula
