- Physiological needs (food, water)
- Safety needs (security, stability)
- Social needs (relationships, belonging)
- Esteem needs (respect, recognition)
- Self-actualization (personal growth, fulfillment)

In the workplace, understanding these needs helps organizations design jobs that motivate employees and meet their psychological requirements.

Herzberg identified two sets of factors affecting job satisfaction:

- Hygiene Factors: salary, company policies, working conditions
- Motivator Factors: achievement, recognition, responsibility, personal growth

- Instrumentality: belief that performance results in rewards
- Valence: value of the rewards

Employees are motivated when they believe their effort will lead to desirable outcomes.

McGregor's Theory X and Theory Y

These theories describe two contrasting management styles:

Effective management often involves understanding these assumptions and applying appropriate leadership styles.
