Introduction to Colonial American Dress

The clothing of the American colonial period (roughly 1607-1776) was primarily functional, crafted from readily available materials and adapted to the climate and local customs. Since most colonists relied on homemade garments, their clothing often reflected resourcefulness and practicality. While some wealthier colonists could afford imported textiles and finer tailoring, the majority wore simple,

durable clothes suited for work and daily life.

The everyday dress was also influenced by European traditions, particularly from England, the Netherlands, and France, but adapted to new world conditions and resources. Over time, regional differences emerged, with New England's colder climates requiring warmer clothing, while southern colonies favored lighter fabrics suited for the heat.

Materials and Fabrics

The foundation of colonial dress was the fabric. Most garments were made from:

- Wool: Widely used for warmth, especially in colder regions like New England. Colonists often raised sheep for wool, which they processed themselves.
- Linen: Made from flax, linen was common for undergarments, shirts, and shifts. It was valued for its coolness and breathability.
- Cotton: Though less common initially, cotton became more accessible later in the colonial period, especially in southern colonies.
- Leather: Used for shoes, belts, and some accessories, often locally tanned.

Pros of Colonial Fabrics:

- Durable and long-lasting.
- Locally sourced, reducing dependency on imports.
- Adaptable to various clothing styles and functions.

Cons:

- Labor-intensive to produce and process.
- Limited color options, primarily natural shades unless dyed.
- Worn and patched over time, reflecting frugality.
