Japanese media theory is characterized by an integration of Western models with indigenous perspectives, resulting in nuanced approaches to understanding media's role in society.

Culturalist Approaches and the "Cultural Sphere"

One dominant strand in Japanese media theory emphasizes the importance of culture in shaping media consumption and interpretation:

- Culturalism posits that media messages are embedded within cultural codes, symbols, and social norms.
- The "Media as Cultural Artifacts" perspective views media texts as reflections of societal values, identity, and historical context.

This approach aligns with Japan's broader emphasis on collectivism, social harmony, and interpersonal relationships.

This perspective highlights the importance of interpersonal communication and social cohesion, key values in Japanese society.

Japan's pioneering use of technology has also influenced media theory:

- The "Techno-Communication" paradigm examines how technological advancements (e.g., mobile phones, high-speed internet, AI) transform communication practices.
